

## Scientist (m/f/d)

### Mobility & Climate Protection, Transport Policy, MaaS, Rail Sector

**M-Five** is a think tank for sustainable futures. We offer holistic research and consulting services in the areas of mobility of the future and economic impacts assessments. The two areas are connected by the analysis of innovations to implement sustainable mobility. M-Five experts have key competences in the innovation systems of the different transport modes and the development of alternative futures of mobility. Together with their sound knowledge of societal trends and economic structure they deliver strategic advice to our clients.

To strengthen our scientific team, which deals with analyses of the future of mobility, transport policy and climate protection, we are looking for a head who can think coherently and has an affinity for numbers (f/m/d).

#### Your profile:

- ◆ You have a doctorate, are about to do so, or have practical experience after completing a degree in transportation, industrial engineering, sociology, physics, or a comparable field with a specialization in the area of mobility
- ◆ You are highly interested in questions concerning the transformation to a climate-friendly, sustainable mobility of people and goods.
- ◆ Competencies in environmental assessment of transport modes, market conditions of the railroad sector or new business models of mobility service (e.g. in sharing or pooling) would be advantageous
- ◆ We work in an international environment where very good knowledge of English is important and further language skills are an advantage

#### Your tasks:

- ◆ Collaboration on exciting research and consulting issues for European institutions
- ◆ Collaboration on innovative solutions to transport and environmental issues at local and federal level
- ◆ Assessment of climate and environmental impacts of different transport modes
- ◆ Analyses on market conditions of the railroad sector or on business models of mobility services

We offer:

- ◆ Working within a young, dynamic and interdisciplinary team with exciting research and consulting issues as well as changing clients
- ◆ Our office is located close to the train station in Karlsruhe
- ◆ Our office is very well connected to the train and public transport system
- ◆ We offer 30 days of vacation annually
- ◆ Home Office is made possible by arrangement
- ◆ Financial support for the use of public transport
- ◆ Team building and further training measures
- ◆ Free coffee, water, tea
- ◆ Preparing lunch with your colleagues – voluntary, of course

We are looking forward to receiving your application, preferably including a sample of your work (journal paper, thesis, etc.). Please state the earliest date you can become part of our team. For a first contact, please do not hesitate to contact Dr. Schade at 0721 / 824 818 90.
